Preparing for National Holidays--Victoria and Dominion Days

United Support of Business Men Urged to Prepare for Annual Sports

May 24 and July 1 are national holidays. On May 24 a football match will be played and a dance held. For July 1, Dominion Day, plans have yet to be made. This will necessitate raising about \$500 by donations from business houses, and sale of tags. It is a day which should be observed by Coleman with enthusiasm, for there is no other occasion taken advantage of here during the summer for a sports day for the children.

Business men will be asked to donate as generously towards the day and doubtless there will be the same measure of support accorded as last year. Volunteer workers are urged to help the committee, for a little help from many makes the work light.

31st Anniversary of Frank Slide April 29

"River of Rock" by Florence Elder Niles, published in the current issue of Maclean's magazine, describes in vivid detail the main incidents of the famous Frank slide, the 31st anniversary of which occurs on April 29.

From debates of House of Commons 1903, is taken the report sent in by the Inspector of Surveys in the Northwest Territories, as the provinces of Alberta and Saskatchewan were then known:

"34 men, 8 women, 20 children killed. Eleven injured. Probably only two or three dangerously. Have good attendance. Only two killed in or near mine. Ten dead recovered. Remainder nearly all buried under many feet of rock. Possibly a few near edge of slide may be recovered. Killed miners 21. Balance, ranchers, merchants, firemen, engineers, railway conductors, laborers. Six cottages totally destroyed by rock. Twenty others with feathers and broken into matchwood. One partially destroyed. Ten habitations of ranchers and others outside of Frank destroyed. All machinery installed and large amount of new machinery near tunnel mouth totally destroyed. Tiptoe scales, engine house, and all other plants destroyed. Uncertain whether or not tunnel materially injured. Probably not.

It is of interest to note that Frank H. Graham, proprietor of Cabinet Cigar Store, was a victim of Frank at the time. He recalls the terrific rush of air which the slide caused, and his family were among those who miraculously escaped. The full force of the titanic avalanche.

UNITED CHURCH

The usual services will be held at St. Paul's on Sunday, April 29, with the minister in the morning. The choir will sing in the morning and the sermon-subject will be "Steadfast, Unmovable, Abounding." In the evening the sermon-subject will be "Message for the Springtime," based on "The Parable of the Sower."

The Sunday school will meet at 12:15. The teacher's training class will meet on Saturday at 7 and on Sunday at 3.

Mr. Taylor was greeted most heartily by his former parishioners at First United Church, Lethbridge, last Sunday. The congregations were excellent and Mr. Taylor and Mrs. Taylor and Winona thoroughly enjoyed the week-end. While at Lethbridge Mr. Taylor was the guest of Mr. McIlvenna.

"Old Soldiers Never Die"

Harry W. Clark Sr. has been off duty from the mine office of International Co. for two weeks, suffering from a severe attack of influenza. To add to his suffering, he had a painful attack of gout. He was up for a short time on Monday, and hopes to soon be back on duty. Which case to mind the old soldier's words of the reveille: "The sergeant-major soon will be around." Harry is one of the Boys of the Old Brigade, who never die, for they simply fade away. But judging from his cheerful appearance when the reporter saw him, he has no immediate intention of fading away. And if you would like to hear how painful gout is, just mention the word to him. The only sympathy he got from the doctor was a good laugh, for he told Harry that it would keep him in bed and therefore compel him to take a rest.

Rev. J. W. Churchill of Lethbridge was the guest of Mr. and Mrs. Archie Beveridge during his stay here over the week-end.

Pattinson's hardware has the garden tools you're bound to need, and prices are right.

Coleman Canadians Honored By Citizens Presentation

COLEMAN CANADIANS HOCKEY CLUB
WESTERN CANADA INTERMEDIATE CHAMPIONS 1933-34

Back Row—F. G. Creegan, president; C. J. Devine, R. F. Barues, executive; Jack Kwasney, coach; Dr. K. McLean, Rev. Roy C. Taylor, J. A. McLeod, executive. Second Row—R. Pattinson, secretary; Ivor Bolt, trainer; H. Gardner, defence; V. Llysa, r. wing; J. Joyce, center; J. Olive, l. wing; John Kapaska, forward; J. Atkinson, trainer. Third Row—F. Brown, r. wing; R. Johnson, r. defence; V. Cologrosso, goal; W. Fraser, center; C. Kwik, goal; R. Kwasney, l. defence; G. Jenkins, l. wing.

President L. L. Morgan, A.A.H.A. Presents Trophies, and Mayor Pattinson Makes Citizens Presentation

The presentation to the Canadian hockey club on April 18 in the Community hall was attended by many of the citizens, when Mayor Pattinson, on their behalf, presented the players of the championship team with engraved gold watches, and spare players and the president and secretary, as well as the coach and trainers, with leather club bags.

L. L. Morgan, president of the Alberta Amateur Hockey Association, presented the Alberta provincial championship trophy (intermediate) and as there is no trophy existing for the Western Canada champions, he

hoped that by next year this would be remedied. He congratulated the team on their achievement, and commended the people for giving their support and showing their appreciation by attending that evening. He paid a tribute of praise to Coach Jack Kwasney, and stated that any town feels more proud of its own boys stepping out and winning a championship than if they imported players.

He strongly urged that the younger boys from ten years up be encouraged to play hockey, and stated that the provincial association would appropriate a sum of money to encourage amateur hockey, and junior hockey. Develop the younger players, then we will not worry where senior players are to come from, stated Mr. Morgan.

Sport Notes from Tuesday's Bulletin

HILLCREST AND COLEMAN TIED IN EXHIBITION GAME

The football season opened on Saturday with a spirited game between Hillcrest and Coleman, with a score of 3-3, in which W. (Bill) Fraser, star centre forward of Coleman Canadians hockey team, in his first game of senior football, scored two goals, while D'Ercle starred as centre forward for Hillcrest.

Each team showed changes from last year, with four new players on each side. Cologrosso, goal-keeper for Coleman, was playing his first game, and with more experience will be hard to beat, while Freddie Brown on right wing shows up well.

In the first half Hillcrest pressed the attack, but Coleman gradually came into their own and forced the tie. The junior players of Coleman were scored by Coleman from a scrimmage in front of Hillcrest goal. The ball trickled out to Fraser, who shot it out the prostrate bodies of two players to put Coleman one up.

This caused Hillcrest to put more pep into their play and the score was evened by D'Ercle beating Coleman defence, driving a swift shot past Cologrosso. Eight minutes later the goal mouther of the goal judge grounded that put Hillcrest two up ending the period 2-1 for the visitors.

The second half featured end-to-end play, and after six minutes Coleman started a heavy bombardment on Hillcrest goal which ended when a Hillcrest back handled the ball, conceding a penalty. The spot kick was taken by J. Anderson who booted it into the net. A few minutes later Fraser broke away and coolly lobbed the ball over the on-rushing Hillcrest goalkeeper's outstretched arms.

In the last few moments of the game D'Ercle, of Hillcrest, shot at Cologrosso, who caught the ball, but due to inexperience turned slightly into the goal mouther, the goal judge ruling a goal scored, making the score tied.

MISCELLANEOUS

John Williamson of Pincher Creek Branch, Canadian Baptist Conference, visited friends here on Sunday.

On Sunday the Rangers hiked to Knowles ranch in charge of Mrs. R. Knowles and Mrs. C. J. Devine.

A number of Girl Guides in charge of Miss A. Yule, went on a hike and for Guide tests on Saturday, hiking to a point beyond Beck's ranch.

Blairmore was disturbed by a number of fights on Saturday, out of which some court cases are likely to develop.

Line up: Coleman—Cologrosso, Griffiths, Burrell, Gardner, J. Anderson, Park, Balloch, W. Anderson, Fraser, John Anderson, Brown.

Hillcrest—Makin, Reid, Price, Elker, Fryde, Richards, Brown, Draper, D'Ercle, S. Richards, Waters, Referee, P. Sharp, Coleman.

Hillcrest will play a league game at Kimberley, B.C., on Sunday next.

SOFTBALL LEAGUE WILL LIKELY BE ORGANIZED

Springtime is here and summer is in the offing. Everyone has the fever manifest itself in one form or another. The softball season is just around the proverbial corner and a lot nearer than the return of prosperity, which has been just around the corner for a considerable stretch of time. While we are waiting for the other, WHY not a Coleman softball league this summer. There is a dearth of players and would be players if they had the chance. This is always the way at the beginning and seldom at the finish. A manager loses heart with so little loyalty shown by so many players and is not very anxious to tackle another such job when another year rolls around.

There are plenty of organizations that should be able to field a team and have the support behind it to carry it along. International Mine, McGillivray Mine, The Merchants with two teams, Bushtown, High School should have a team with teachers and pupils, West Coleman home to tie the score. A few minutes later Fraser broke away and coolly lobbed the ball over the on-rushing Hillcrest goalkeeper's outstretched arms.

In the last few moments of the game D'Ercle, of Hillcrest, shot at Cologrosso, who caught the ball, but due to inexperience turned slightly into the goal mouther, the goal judge ruling a goal scored, making the score tied.

Frank G. Graham, John A. McDonald and C. J. Devine have taken the gentle path of golf, and are acquiring a new vocabulary. Even the birds are getting scared, and seeking new nesting places. Down at the creek on the golf course the only wild life now to be seen are new golfers putting off for lost balls.

Delivery boys for The Journal are Billy Taylor for central portion of town and hill; J. Anderson for West Coleman; Louis Destobrel for East Coleman. If copies are not left regularly at subscribers' homes, kindly notify office, telephone 209. Boys will be glad to call.

Look up Coleman Hardware Co. advt.

Memorial Service at Michel

Mr. and Mrs. M. Joyce and a number of friends of Mr. Jenkins, killed in a mine accident at Michel, attended a memorial service in the Anglican church there on Sunday evening, conducted by Rev. A. G. McMorris. The Knights of Pythias and the Pythian Sisters lodges attended. Mrs. Joyce is a sister of Mr. Jenkins, who was well known to many in the Pass towns.

THRILLING BOXING PROGRAMME PLEASES FANS

COLEMAN, April 21.—In a thrilling exhibition of ten 2-minute rounds, Murdo Morrison, of Kimberley, was given the decision over Harvey Jesse, of Medicine Hat, in the Crow's Nest Pass middleweight championship series this evening. Referee Delini awarded five rounds to Morrison, two to Jesse and three even. Morrison's weight 152, Jesse 151½. Jesse immediately challenged Morrison to meet in ten 3-minute rounds at Michel, B.C., on May 1. Both were given a good hand. Bill Burrows, old-time boxer of the Pass towns, was in Jesse's corner, and Rod Jamieson in Morrison's.

The semi-windup saw a spirited 7-round match between Kid Winters, of Crow's Nest, B.C., and Billy Hogan, of Shelby, Montana. Though conceding 11 pounds to Hogan, Winters won on a popular decision by Referee Delini. In round 5 the bell saved Hogan, the crowd clamoring for a knockout. He recovered and came back strong in the sixth, it being even, but in the seventh it was Winters' round.

In the preliminaries Hedley Rees, of Hillcrest, went five rounds against Am Celli, of Coleman, both at 118 pounds. With plenty of give and take, Terry McGovern, referee, gave it as a draw. In the juvenile and midget boxing, the following were awarded draws: Dino D'Martin vs. Am Celli; Jackie Goldrett vs. John Biliak; Jackie Goldrett vs. Jasper Jones; Ingarv Anderson vs. Young Lloyd; and two peppy midgets, Hugh McEwan and Young Salvador.

The following challenges were given out by Promoter Barrington: John Verquime, of Calgary, challenged anyone in Canada at 175 lbs; Johnnie Campbell, of Lethbridge, challenged the winner of the Winters-Hogan match; Gus Volner, Drumheller, also challenged; Tommy McCloy, of Lethbridge, challenged the winner of the Morrison-Jesse match. It was a good card throughout, plenty of action and the fans were well pleased with the entire programme.

Life insurance in reliable companies gives peace of mind and security. See A. M. Morrison.

28th Anniversary of St. Paul's Church Observed on Sunday

The 28th anniversary of St. Paul's church, now known as the United church, was observed on Sunday, the Rev. J. W. Churchill, B.A., of First United church, Lethbridge, preaching at both services and on Monday evening he delivered an address entitled "Hits and Misses" following the supper so creditably served by the Ladies Aid.

Mrs. D. Thomas of Hillcrest was the soloist at the services and her fine voice was also enjoyed at the concert on Monday evening.

The Journal regrets it has not an interesting historical record of the church to accompany the report of this anniversary, for there must be many reminiscences to relate by those who have been connected with the church since it was founded. Former ministers and members of the church in distant parts who may read this brief report of the 28th anniversary will doubtless recall many interesting incidents, and will join in the general good wishes which accompany an anniversary.

The services were well attended as was also the gathering on Monday evening. Rev. Roy Taylor was chairman and introduced Rev. J. W. Churchill. The address was replete with wholesome philosophy illustrated by many personal observations from the speaker's long experience of 43 years in the ministry.

John Petrosky, violin selection; Mrs. D. Thomas, songs; W. C. Cole, tenor solo; Miss W. Cranston, musical reading; Mrs. Robt. Holmes, humorous reading.

Mr. Taylor thanked all who had contributed to the splendid concert and also the ladies for the bounteous repast. The gathering was marked by a happy spirit and was brought to a close by the singing of the National Anthem.

CARD OF THANKS

It is with heartfelt gratitude and sincerest appreciation that Mrs. Jenkins and family of Michel, desires to acknowledge the innumerable tokens of sympathy shown during their sad and tragic bereavement, expressed by letters, word of mouth by floral tributes, loan of cases or in any other way.

A Record Of Service

Forty-four years as member of any parliament, even in the inconspicuous role of a back-bencher, would be an impressive record of service and endurance. It would indicate, at the very least, a tremendous capacity to resist boredom and endure platitude.

Forty-four years as member of the British parliament, where the M.P.'s job is pretty much a full-time affair, is almost a transcendent feat for, at Westminster, oratorical standards differ but little from those of parliaments and legislatures nearer home.

Forty-four years as member of the British parliament, thirty of them in the very forefront of polemical politics, twenty of them in the role of an imperial as well as a national figure, and, at least ten of them as a world luminary, represents something, however, which cannot be judged by ordinary criteria.

Forty-four years as member of the British parliament, during eighteen or so a member of the cabinet and six of them spent as war-time premier, the dynamic centre of a whirling world—that is the consummate achievement which fell to the lot of a little Welsh lawyer.

David Lloyd George: Perhaps it was unnecessary to mention the name for, were it pored to any group of intelligent citizens within the British empire, it is doubtful if the juxtaposition of "forty-four years" with "war-time premier" in the question, would fail to elicit the right answer.

David Lloyd George has just celebrated his forty-fourth year as member of the British parliament. In that long term, the little Welsh lawyer who entered the portals of the "Mother of Parliaments" with none of that political background which, prior to his advent, was deemed essential to ministerial rank, has run the full gamut of political achievement; has scaled the dizzy heights and been dashed from them; has tasted the sweet fruits of popular acclaim and the bitter of obloquy. Spectacular always, in success as in defeat, his is perhaps the most amazing personality in its very contradictions of a generation replete with outstanding figures.

To-day, in the quieter nooks of political life, the old fires burn dim—but they still burn. The flash of those "Linchouse" days which added a word to the English language is recalled, ever and anon, as he asseverates warnings and rebukes a heedless world heads not. From the couch of the prophet, or the desk of the mentor, he sallies, occasionally, to guide and to counsel those who, caught in the full flood of the stream, pay little attention to what adumbrates the stiller eddies of the backwaters. In sickness or in health, one word of contumely brings the old fires forth. Jove still can thunder—obligations!

His attendance at sittings of parliaments is rarer than it used to be, but a strange reaction follows his periodic entries. Be the debate never so dull, when Lloyd George appears members rush themselves from lethargy and prepare for action. Impetuously, a ripple animates the house, electricity is in the air. Lloyd George has entered! Surely here, despite the fact that a whirling world has thrown him from the vortex, is anything but a spent force.

Two or three weeks ago, he celebrated the forty-fourth anniversary of his election to parliament. If he were asked what is his fondest recollection over all those years, undoubtedly, his answer would be: it had been given him to retain the respect, the loyalty, the confidence and the affection of his own constituency of Carmarvon. That is, perhaps, the most amazing feature of his amazing record. For forty-four years he has enjoyed the unbroken loyalty of his constituents. For forty-four years he has enjoyed their confidence, their respect and their affection. Surely no man could ask more. That is the mead of his service and the gauge of his success.

The Safety Of Surgery

Technique So Perfect Now Could Hardly Be Improved

"The operating table is safer than the crowded streets outside," says a noted British surgeon.

Not long ago another surgeon, Lord Moynihan, declared that the technique of surgery is so perfect nowadays that he did not see any way in which it could be improved.

We sometimes read that So-and-So died after an operation. The phrase is somewhat unfortunate, because it carries the suggestion that the operation had something to do with the cause of death. It is not the operation that causes death, but the disease or injury which made the operation necessary. The operation was the only chance of saving the patient's life, and either the operation had been delayed too late, or the injury was too severe. St. Thomas Times-Journal.

Making Further Experiments

M. Georges Claude's vessel, the Tunisie, is being equipped, and shortly will be ready for further experiments in producing cheap power from the sea. The vessel is of 10,000 tons and has a complete sea-chest plant capable of producing 2,500 horsepower. Two-thirds of this power will be used to operate an ice-making machine, for Claude expects to anchor near the shore of some tropical place and make ice for sale at a fifth the present price.

Household Drudgery

The Bane of a Woman's Life

Nature intended women to be strong and healthy instead of weak and sickly, but how can a woman have good health when she has to go through the household drudgery without any relaxation. Is it any wonder she becomes nervous and irritable, has hot flashes, faint and dizzy spells, shortness of breath, sinking and smothering sensations, and can't sleep at night.

Women who are weak and run down will find in Milburn's H. & N. Pills a remedy to strengthen the system and bring back the much desired health.

Works With Steel Hands

Remarkable Story Of Courage Displayed By Crippled Boy
In a little repair shop at Meaford, Ont., a man works day after day with steel hands. He has worked with them for 30 years, ever since he and his blind father made them to replace hands and forearms of flesh and bone he lost as a boy when he fell against the whirling blade of a buzz saw.

Andrew A. Gawley, "the man with the steel hands," was only 17 when a momentary slip deprived him of his forearms. For months he lay in hospital, but when he came out he was determined to earn his own living. There was one man at least he believed more unfortunate than himself. His father had been blind for 50 years.

Father and son labored long designing and making new hands for the boy. When they were finished they had five grips of different sizes, and different degrees of leverage. Two grips open as Gawley draws his hands towards his body; the others open when the arms are extended.

Gawley can crush a stone teacup with his "fingers," hold a teacup with perfect control, shave himself, dress himself, tie knots in a rope, throw or catch a baseball. He can thread a needle, drive an automobile, ride a motorcycle. He has been known to lift more than 250 pounds dead weight with one "hand." Gawley writes with a steel hand.

He was born near Stokes Bay on Bruce Peninsula and in his youth was a star of Stokes Bay football team. He is 49 years old now, still making his own living, handling tools with the skill of a master craftsman and earning, among other things, artificial limbs for persons afflicted like himself.

Figures Hard To Grasp

Value Of Canada's Gold Production Runs Into Millions

What a part gold has played in the world's story! The civilizations of Egypt and of Assyria; the kingdom of Solomon; the glory of Spain; the gold-fueled of quests for far Cathay; the California and Klondike epics—all are part of the romance of history, of man's eternal grasping for wealth. Now after thousands of years, Canada emerges as one of the great gold countries—the second greatest in the world—and Mr. McGowan, a Canadian minister, saw stories of gold that stagger the imagination. It is a tremendous thing.

Thirty years ago Ontario's production of all metals—gold included—was \$5,000,000. Last year its gold production alone was \$201,000,000. On top of that we are producing nickel at the rate of \$20,000,000 a year, copper at the rate of \$9,000,000. In the last four years \$190,000,000 worth of gold has been taken from Porcupine and Kirkland Lake. More than \$153,000,000 was paid out in gold dividends.

These, truly, are figures for pessimists.—Ottawa Journal.

Despite Price Rise
Tea Still Most
Economical Drink

For the past two years people in Canada have been enjoying the lowest prices for tea in a decade, but this has meant tremendous savings to growers who, to save their industry, have restricted tea exports and caused prices to advance. Tea packers, particularly those supplying fine quality teas, have reluctantly been forced to increase prices.

Must Prove German Blood

Nobility Of Germany In Danger Of Losing Their Titles

Germany's nobility was called on recently to prove their German blood back to 1750, or renounce their titles. The president of the German Nobility Association invited members to submit a genealogical table of their families, going back to 1750. Noblemen and noblewomen who cannot establish pure German blood, according to Nazi standards, must renounce their titles.

Tortoise On New Coin

Just why a tortoise should be depicted on a coin in these times of fast moving money, is being conjectured by those who have seen the new coins of the Fiji Islands. The piece is worth approximately 12 cents. The only explanation is that the tortoise lives in the mountainous country of Fiji. The shilling, valued at about 25 cents, shows a speedy Fijian barque. The coins are part of a complete new series.

W. N. U. 2043

Agricultural Notes

Many Items Of Interest To The Western Farmer

Much the greater part of Peru's wheat crop is grown in the sierra, the mountainous, high-altitude district.

Japan has about 900 woolen and worsted weaving mills and imports 96 per cent of her wool from Australia.

Commercial production of peaches in Canada is confined to Ontario and British Columbia, 88 per cent being in Ontario, chiefly in the Niagara district.

At the Perth stock sales in Scotland, an Aberdeen-Angus bull (Primals of Lethen) was purchased by Sir Edmund Findlay of Aberlour for 1,000 guineas (5,250 dollars).

Canada is the largest supplier of butter to British Honduras (West Indies) where there is also a fairly large demand for pickled pork and beef in barrels, lard, bacon and hams, canned meats and cheese.

The chief hay producing areas in Canada are the Ottawa, St. Lawrence and St. John river valleys, the dyked areas of the Maritime provinces, the Georgian Bay area of Ontario, and southern Alberta.

Canadian agricultural products on which British preference is given, such as condensed milk, canned goods and preserves, are offered a particularly promising field in British Malaya.

Available statistics indicate some decrease in hog production last year but the numbers of hogs marketed at public stockyards and packing plants somewhat exceeded those of the previous year.

With the attention that is being given to the grading of dressed poultry and eggs during the past few years in Canada, a big increase in the Canadian export trade is forecast.

The financial inability of farmers in the past four years to pay the usual prices for registered seed grain has resulted in reducing slightly the volume of production of registered seed, particularly in the prairie provinces.

Of the oats produced in Canada, approximately 7 per cent is used industrially by Canadian mills, while the bulk is utilized on Canadian farms for feeding purposes. During the past ten years, only 4.5 per cent of the total annual production has been exported as grain.

The sheep population of Korea and other Japanese dependencies, all of them in the Far East, is negligible, but there are about three million sheep in the new kingdom of Manchukuo where steps are being taken to encourage sheep raising and to improve the fleece which at the present time is of poor quality.

In the poultry world throughout Canada, the hatchery approval of the Dominion Department of Agriculture is making it possible for keepers of poultry to obtain a yearly dependable supply of bred-to-lay chicks, while the cockerel distribution policy enables breeders who supply eggs to hatcheries to secure outstanding prices from record of performance birds.

Safety Of Mail Bags

England Lost Only One Out Of 40,000,000 Last Year

Only one of more than 40,000,000 mail-bags, each containing an average of 5,000 letters, had come to grief last year in Britain up to the end of October. And that bag contained nothing of value. A few years ago the average number of mailbags stolen in a year was more than 60, while there were frequent attacks on officials in isolated post offices. There have been few such attacks this year—none of them successful. A reorganization scheme involving close co-operation between Scotland Yard and the special investigation department of the Post Office police throughout the country is responsible for the improvement.

Mrs. Teetwhiffle: "Did you change the services as I told you?"

New Maid: "Yes'm. I shuffled 'em and dealt 'em out so's no one gets the same one he had at breakfast."

Bluebirds almost faced extinction late in the '90's.

Wizard At Illumination

Nova Scotia Man Planned Many Spectacular Lighting Effects

Walter D'Arcy Ryan, famous creator of lighting effects and director of the illuminating engineering laboratory at the Schenectady works of the General Electric Co., died recently of a heart attack at his home in Schenectady.

Born in Kentville, Nova Scotia, 63 years ago, the son of the late ex-Mayor and Mrs. J. W. Ryan, Walter Ryan had for many years been known as the "wizard" of illumination.

He was the man who had outshone the Aurora Borealis or the scintillating stars of a moonlight night with electrical effects of his own devising. For instance, the illuminating of Niagara Falls, the magnificent lighting effects of the Panama Pacific Exposition in San Francisco; those of the Exposition in Rio Janeiro, Brazil; the Washington Arms Conference; the Silver Jubilee of the City of New York; the Altar of Victory in Chicago; the Republic Eagle Sunburst, during the National Convention in Kansas City, and his most marvelous achievement of all, the lighting of the 1933 World's Fair in Chicago.

Of this Nova Scotia-born engineer, Thomas A. Edison once said: "This man Ryan has performed miracles."

New Radio Telephone

A novel ultra-short-wave radio telephone sending outfit, operating entirely from self-contained dry batteries, which weighs 15 pounds and is capable of sending spoken messages clearly over distances of more than a mile through city streets, has been developed. The wave-length utilized is 100 centimeters or about 39 inches.

India's oldest society, the Asiatic Society of Bengal, recently celebrated its 150th anniversary.

Producing maple trees on eastern Canadian farms total 70,000,000.

Japan's Rivalry May

Cut Living Standard

American Diplomat Says Competition Hard To Cope With

Japan's commercial rivalry ultimately may result in a lower standard of living throughout the world, Richard Washburn Child, American diplomat, said.

Child, in Europe as President Roosevelt's special representative to study and improve trade conditions, said he had come to the conclusion during his two weeks' study in Great Britain—first stop on his trade tour.

He admitted that at present he discerned no means of coping with the increased commercial rivalry of the Japanese, with their lower wage scales and production costs, which threatens to wreck the English textile trade abroad, including India.

"My British friends told me that they believe the Japanese technical efficiency is at least as vital a force in enhancing Japanese competition as lower wages and their living standard," he added.

The incubator capacity of the 178 approved hatcheries under the hatchery approval policy of the Dominion Department of Agriculture provides for 22,043,400 chicks.

More Frequent Use Of World Courts To Further Peace Cause

Ottawa.—A possibility of achieving world peace by more frequent use of world courts to settle international differences rather than by recourse to arms was advanced by Prime Minister R. B. Bennett, addressing the Red Chevrons Club here. The club, composed of veterans of the first contingent, commemorated the second battle of Ypres.

"Sir Robert Borden, Canada's wartime premier, who joined with Premier Bennett in proposing the toast to the 'first thirty thousand,' also pleaded for world peace. 'If the league fails it will be because humanity fails,' he said.

Sir Robert was of the opinion there were glimpses of sunshine in Canada and throughout the world and he foretold for Canada a great destiny. Other speakers were Major F. M. T. Board of the Royal Canadian Navy, and Lieut.-Col. Eric MacKenzie of the Scots Guards, one of the first immigrants to land in France in 1914.

An honorary member of the club, Mr. Bennett said that since the last meeting the country had shown marked improvement and that the faces of the members themselves, despite the individual hardships which they might have suffered, looked happier than a year ago.

Battle Tuberculosis

Quebec Province May Adopt Lines Employed By Saskatchewan

Montreal. Attempts to battle tuberculosis along the same lines employed by Saskatchewan will be made by Quebec it was learned here, as various anti-tuberculosis societies gathered to make preparations for the convention of the Canadian Anti-Tuberculosis Society Association here June 6, 7 and 8.

J. J. McQuinn, member of the Saskatchewan commission, was asked to attend the meeting, officials said.

Lower Tariffs

Ottawa.—Downward revision prevailed in the 72 changes in the customs tariff announced in the budget. Reductions under all tariffs were 24; reductions under British preferential only, 15; reductions under intermediate and general only, 13; increases under intermediate and general only, two; increases under all tariffs, one, and clarification of wording only, 17.

Cannot Take Pictures

Singapore.—Roy Tuckett, British aviator, now flying from Great Britain to Australia to photograph the air route of next October's race, was forbidden by the Netherlands government to take pictures of the Dutch East Indies and decided to return to London.

Pennyworth For Sale

Quebec.—The S.S. Pennyworth, forced ashore by ice last fall on the Island of Orleans, is being offered for sale by her agents, the Montreal Shipping Company. No bids were received for the purchase of the vessel which is stranded on the spot where she grounded in November.

New Set Of Rules To Assure Fair Business Methods In Canada

London, Ont.—George S. Hougham of the National Fair Trade Council of Ottawa told an audience the Dominion government will appoint a new minister or referee to supervise a far-reaching and revolutionary "fair trade" code for Canadian merchandising and business firms.

Mr. Hougham, speaking before the London Retail Merchants' Association, said the new referee will be empowered to suspend licenses and inflict penalties for infraction of rules that will be contained in the new code.

"The government," he declared, "has stated something that even Mr. Stevens (Hon. H. H. Stevens, minister of trade and commerce) himself could not step if he wanted to."

He said the Stevens man buying probe had offered the Canadian businessman an unprecedented opportunity to solve his problems on a basis that would be beneficial to pro-

Sensational Charge

Claim Trotsky Plotted Revolutionary Dictatorship In France

Paris.—The sensational charge that Leon Trotsky plotted for a revolutionary dictatorship in France through the fatal February street riots was disclosed by authorities as the exiled Red army leader hunted vainly for another refuge.

They said a manifesto he issued after the disorders called for "an armed workers' militia," and declared that "war has just begun between them; there is no possible peace, but in a fight to the death; in the street, by force, will be decided the future."

Police pressed the bewildered Trotsky to move on from his villa in suburban Barbizon, where he had lived mysteriously for four months until gendarmes raided it recently.

Officials said they wanted him to leave as soon as possible, but were willing to be patient for a few more days in "view of the menace to his life."

Where he had set was a matter of conjecture.

Hitler Is Forty-Five

But Leader Did Not Take Part In Birthday Party

Berlin. Friday, April 20, was Adolf Hitler's 45th birthday, and to signalize the event the streets fairly dripped with red Nazi flags, gallons of ink were used by thousands to sign congratulatory telegrams at the chancellery, and papers printed appeals and praises.

The chancellor's picture dominated newspapers and shop windows. Prayers were said for his further success as special services in Nazi Christian churches. Bays of runners conveyed felicitations. Large crowds clamored for the leader in front of his official residence.

But Hitler himself did not attend the happy birthday party in the capital. The night before he slipped away unostentatiously with intimate friends to his simple country home high in the Bavarian mountains. He spent the day quietly in the surroundings he loves so well.

Prohibit Smoke Screens

National Revenue Department Puts Ban On Importation

Ottawa.—The department of national revenue comes to the aid of the civil authority in the addition to the list of articles whose importation into Canada is prohibited of "smoke screen apparatus, for use on motor vehicles or on water-borne craft of all kinds."

It is understood that this prohibition was made at the request of the Royal Canadian Mounted Police, who, in pursuit of their anti-smuggling activities, have encountered both automobiles and gasoline launches equipped with devices for the spreading of smoke-screens. This facilitates the escape of the law-breakers.

The police figure that no citizen occupied in any peaceful pursuits requires apparatus for the making of screens.

ducer, consumer, retailer, employee and every branch of business life."

"It is the most spectacular step ever taken by a government in this country," he declared, "and if we do not make use of the door that has been opened we should never complain again that the government has done nothing for us."

"Something is going to come of this trouble if the business people of Canada do co-operate," he continued. "A set of rules to assure fair business methods will be established, and it must be the men in the business concerned who make them."

"They can go to the government with their decisions and if these rules are believed satisfactory to the people as a whole then the necessary legislation will be passed. That is, I believe, how the government will carry out its program. It is now up to the business people to do something."

Britain Is Pleased

Favorable Reaction to Canada Budget Evidenced in Old Land

London.—Appreciation was the keynote of British comment on the Canadian budget. Although British industry has not yet had time to thoroughly study the budget, one leader of industrial organization here summed up opinion when he told the Canadian Press, "It is not as much as British industry would like from Canada, but at any rate it is an agreeable installment."

Reduction of the empire content needed to qualify imports of a wide range of chemicals for the British preference, from 50 to 25 per cent., was regarded here as practical recognition by Canada that Britain is compelled to rely on outside sources for raw materials in this class.

In other quarters the budget in general was regarded as well calculated to correct the impression about what Britain did not get a "square deal" from Canada, following the economic conference.

Reduction In Interest

Saskatchewan Minister Of Agriculture Would Ease Burden Of Farmers

Ottawa.—Reduction in the interest on public and private debt was urged by Hon. W. C. Buckle, Saskatchewan minister of agriculture, before the Stevens price spreads and made urgent parliamentary probe.

"A tremendous burden would be lifted from agriculture if a drastic cut in interest rates were made," the Western minister declared. "The effect upon both industry and agriculture would be almost immediate." Inquiry by a Dominion commission "with adequate producer representation" into livestock marketing in all its phases was recommended by Mr. Buckle. The witness pleaded before the committee a resolution of the Saskatchewan legislature supporting this suggestion.

Salt Lake Speed Course

Shores Of Great Salt Lake In Utah May Be Used By Sir Malcolm Campbell

Salt Lake City.—William F. Sturm, American representative of Sir Malcolm Campbell, holder of the world's automobile speed record, announced the shore of Great Salt Lake would meet requirements for the speed demon's new record attempt next summer.

His announcement followed a decision of the junior chamber of commerce here to attempt to raise a \$10,000 fund to guarantee expenses of the test.

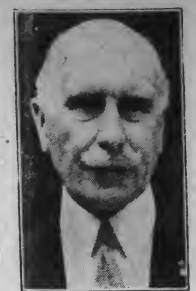

Graceful Gesture

Irish Harps Removed From The Realm Of Taxation

Ottawa.—Hon. E. N. Rhodes, finance minister, having granted a great concession last year to the Scot in placing importations of bagpipes on the free list, made a graceful gesture to the Irish in similarly removing from the realm of taxation importation of harps. The minister's action a year ago provoked peans of praise from exiled Canadians who were quoted as declaring this would "encourage the study of music in Canada."

The harpists have yet to be heard from.

CELEBRATES

The Earl of Athlone, brother of Queen Mary, and a popular member of the British Royal Family, who celebrated his 60th birthday on April 14. The Earl of Athlone is a former Governor-General of South Africa.

Tax On Gold

Revenue To Be Collected Depending On Price Of Precious Metals

Ottawa.—The total revenue the government will collect from the 10 per cent. tax imposed on gold in the budget presented by Hon. E. N. Rhodes, minister of finance, depends entirely on the world price of gold. The tax is payable on the metal when delivered to the mint or exported but the full 10 per cent. can not be collected in whole if its result was to give the producer less than \$30 an ounce.

In other words, the effect of the limitations on the collection of the tax, to all intents and purposes, one of ensuring to the producers—so far as such assurance can be given, having regard to world price fluctuations, a minimum of \$30 an ounce.

In making his announcement, the minister declared that this import would compensate for the reduction of revenue resulting from his slicing the sugar tax from two cents per pound to one cent.

Canada's gold production this year will, in all likelihood, approximate 3,000,000 ounces. Last year production was 2,947,618 ounces. What the average price throughout the year will be can not be guessed. If, however, the figure which the minister gave—one of \$35 an ounce—is maintained, then on an estimated production of 3,000,000 ounces the treasury might be enriched as much as \$10,500,000, which would more than offset the drop of \$9,000,000 in the sugar tax reduction. At least a revenue of \$7,000,000 is expected.

Sees Spot On Planet

Portland, Ore.—A spot on the planet Jupiter is making a night owl of A. V. Goddard, Portland astronomer. Goddard says the spot moves across the planet in about three hours' time each night. Through his 16-inch telescope Goddard has been watching the phenomenon closely, but is unable to explain its presence.

Ruling On Annuities Tax

Calgary.—That only one-quarter of Dominion government annuities are subject to income tax is the effect of a ruling handed down by Mr. Justice Frank Ford, who allowed the appeal of Dr. J. S. McEachran against the Alberta income tax department.

FLYING ON HIS OWN POWER

Discounting the Latus rathy, Erich Kocher, German aviator, becomes the first man in the world's history to fly through space using only his own power. His flying device has rotors instead of wings, and propulsion power is supplied by wind from the flier's lungs. He is shown in flight near Berlin, using, operating the "lung-power" motor.

Four British Skiers Have Successfully Completed Hazardous Mountain Trip

Australia's Methods

Postmaster-General Tells How Government Had Success

Ottawa.—Three hundred members and senators greeted Hon. Archdale Parkhill, Australian postmaster-general, when he was tendered a luncheon by Premier R. B. Bennett. An outline of the financial steps taken by Australia to combat the depression was given but the Antipodean minister made no reference to inflation, one of the cardinal planks.

From a position where the Australian deficit reached \$200,000,000 in the fiscal year 1930-31, it was reversed this year to a surplus of \$22,000,000 and a taxation reduction of \$45,000,000. Under the premier's plan, interest on public debts in Australia was reduced from five and six per cent. to a flat rate of four per cent., salaries of members, public servants were cut 10 to 25 per cent., and social services and general expenses cut to the bone. On the other hand, the sales tax was increased, income taxes stiffened and legislation passed to lower interest rates on private debts.

Gasoline From Coal

Great Britain Hopes To See End Of Importing Petrol

London.—The end of the importation of gasoline into Great Britain becomes an attainable goal with the announcement of large scale production of that commodity by the process of hydrogenation of coal.

Beginning this year, the Imperial Chemical Co. will operate a plant which, when completed, will be able to turn out 100,000 tons of gasoline annually, declared Sir Harry Gowan, president of the company.

Seven years of laboratory research preceded the announcement, he stated. He expressed the hope that the government "would spare no efforts to secure conditions that would permit early stabilization" in order to enable the new industry to resist Japanese competition.

Attempted Train Wreck

Obstruction Is Placed On Track Of Canadian National

Saskatoon.—Attempt to wreck a Canadian National Railway passenger train one mile west of the Vanscoy water tank was disclosed here.

One new tie and pieces of steel cylinder supporting it were placed on the track by persons unknown. The engine of No. 9 passenger train, bound for Calgary, saw the obstacles and applied the emergency brakes just in time.

No damage was done to the locomotive. As it pulled to a stop it broke the tie across the rails.

Royal Canadian Mounted Police and Canadian National Railway investigators are understood to be co-operating in an investigation.

Knight Inlet, B.C. Three intrepid skiers of a British Alpine party arrived here April 20 to complete the hazardous crossing of the Coast Range after five weeks of thrilling adventure.

Sir Norman Watson, leader of the expedition; Wing Commander E. B. Beauman, R.A.F., president of the Alpine Club of England; and Camille Couette, famous Chamonix guide, picked a treacherous route through a nest of giant peaks and icy glaciers and emerged without accident.

Accompanied by Major E. J. King, M.C., of London, and Clifford White of Banff, Alta., well-known Canadian mountaineer, the party left Tatla Lake, B.C., March 18 to pierce the wilderness.

They established a base camp near Fury Gap at the base of mighty Mount Waddington, 13,260 feet, about 80 miles west of Tatla Lake. Major King and White remained at the base camp in reserve. The packers returned to Tatla Lake and the three daring skiers penetrated one of the wildest mountain regions of North America.

Watson and his two companions struggled against severe weather as they negotiated dangerous Fury Gap. They were delayed several days by driving blizzards and were forced to make camp in the half-shelter of snow-laden rock ridges.

Finally, as the weather moderated slightly, they made their way through the crest of the pass, approximately 7,200 feet. Below them stretched myriads of glaciers dotting the slopes of Mount Waddington, once known as Mystery Mountain because of the existence of such a giant peak in British Columbia was doubted by all but the few who had entered the wild and beautiful district.

The men made their way 25 miles down Franklin glacier on Saturday. Though they encountered better weather on this part of the journey, they needed all their experience to avoid yawning crevasses and ever-threatening avalanches.

They neared sea level in safety and made their way to Knight Inlet. The trip of more than 25 miles to this small settlement was comparatively easy.

Sir Norman and his companions planned to fly south by seaplane to Vancouver and intended to get in touch as soon as possible with Major King and White at the Fury Gap base camp, notify them of the successful crossing and arrange for their return to civilization.

May Wreck Plans

Paris.—Germany has been charged with scuttling arms limitation hopes by re-arming in defiance of the world. A strong French note to Great Britain was interpreted as threatening any chances of an immediate arms agreement and said negotiations are "impossible" since Germany is officially admitted to be re-arming her land, air and sea forces.

British Official Circles Are Concerned Over Attitude Of Japan

London.—A breakdown in bilateral disarmament negotiations and Japan's unexpected challenge to activities of the other powers in the far east caused concern in British official circles.

Vexing for Prime Minister MacDonald's government was the abrupt action of France in ending two-sided disarmament dealings, leaving the seemingly hopeless alternative of re-examining the world disarmament conference in Geneva without Germany. Great Britain assumed in part the role of sponsor for these two-party exchanges when her lord privy seal, Anthony Eden, toured continental capitals.

Meanwhile, the Japanese declaration that Japan alone must determine whether foreign attempts to aid China imperil peace and order in eastern Asia dealt a jolt to the British attitude that the United States can do the principal worrying over keeping peace in the Orient while Britain attempts to guide the European nations out of dangerous shoals.

The Japanese warning of Britain,

the United States and other nations, threatened to cause diplomatic tension between Japan and this country for the first time since the National government was formed here.

Opposition leaders wasted no time in demanding, in the House of Commons, that Sir John Simon, foreign secretary, make a statement on the question.

The official declined to comment, saying that further information on the Japanese manifesto was available from the British embassy in Tokyo. Later the Associated Press learned that a report had been received at the foreign office from the ambassador.

Contents of the message were not disclosed, except that it confirmed the gist of press reports of the Tokyo declaration. "The government was said to be disturbed over the unusual form of the pronouncement. British officials said so-called Japanese fears that the United States and other countries sought undue influence in China were unwarranted."

NOTES AND COMMENTS

Mr. Brownlee may seek to form a coalition government on the expiration of the term of the present legislature next year. George E. Cruickshank, M.L.A. for Rocky Mountain constituency, hints this as more than a probability. Whatever one's political opinions may be of the present premier, he has a keen grasp on all matters affecting provincial affairs, and it would be difficult to find a successor as capable, Mr. Cruickshank states.

This corner of the province receives very little serious attention from the government. So badly split has it been politically, owing to the composite mixture of its population, that it has never been forceful enough to command attention, except to bring in the mounted police, and Mr. Brownlee, when his troubles threatened the peace of society.

Just what Rocky Mountain constituency line-up will be for the next provincial election remains to be seen. It has already caused interesting speculation. Rumor has it that the Reds will again contest the seat, also that a well-known Blainmore man is being groomed as a Liberal candidate, while the northern district, including the strong polling divisions at Banff, will likely pull for Cruickshank, besides a strong following in the Crow's Nest Pass, which at the 1930 election gave him a good majority over two opponents. Now that our member is home we may hear a little more of the doings at the capital. There should be much of interest to tell.

A well-known archdeacon of the Anglican church, since gone to his rest, often remarked to unruly congregations: "If you appoint a man as bishop, in Heaven's name, let him 'bish'." We might also add—if you are a regular reader of this paper, and your subscription is due, for Heaven's sake, let's have it! We have no intention of running all over hell's half acre looking for unpaid subscriptions when we get there. We would like them now, as they will do us more good now than later on.

"There is a happy land,

Far, far away.

Where paid-up subscribers stand,
In bright, bright array."

"Let your conscience be your guide." Often it guides men to pay up sums of money withheld for a long time. A very large amount was recently paid to the Federal government by one whose conscience prompted him to do so. Maybe it was an Oxford grouper. Conscience in most cases causes a man to be uneasy if he avoids paying his just dues. It is the still small voice which will not be quieted. Those lines from "The Village Blacksmith" always sound pleasant: "Tolling, rejoicing, sorrowing,
Onward through life he goes;
And looks the whole world in the face
For he owes not any man."

We had better cease fire, or you'll be thinking we're as crazy as a long-haired poet or wild-eyed anarchist.

One's thoughts will wander in scanning the horizon for something of interest.

Those gleaming white blocks being erected at the town hall will give the mayor and council so much pride that the next thing we'll see will be the members coming to meetings rigged up in top hats and long-tailed coats. The more blocks we see erected each day, the more it makes our chests swell. You'd be surprised to know how many copies of The Journal were sent away to former residents, to show the transformation being made in the old town hall. Old Colemanites coming back for a visit won't know the place. Maybe that war memorial so long talked of will yet become a reality. So doth a little heaven spread, and its mighty good work.

That small town newspapers are undoubtedly an asset to merchants and the town generally is testified to by large national advertisers, who frankly state that the weekly reaches people whom the dailies and magazines do not reach. Competitive methods tend to draw business from the small towns to the larger centres with their varied stocks and greater attractions. There is glint on the gingerbread and the fascination of the city appeals to shoppers.

The merchant who uses his brains to plan his advertising and sales methods can do much to offset this by telling in plain language of his prices and quality, and by developing goodwill he has as good a chance or even better of developing the business of his own town than has the city firm.

The merchant who recognizes that it is good business to co-operate with his local weekly newspaper and gives it support through advertising, is doing himself and the town a service.

You do not see free advertising sheets giving any space towards promoting community activities, or reading space for church services and socials. Dear, no! They make a mad scramble to grasp business from those papers which have helped to develop an advertising consciousness; but ask them to give half column to boost something and you'll likely be told that they have so much space for sale for that purpose. They exist for meat ticket purposes only; not for developing community enterprise or arousing civic pride.

Though Frank Barrington arranged a good boxing program, the financial results were no better than last year. The semi-final and the main bout saw two spirited contests between young men who gave a good exhibition, worthy of better support than was accorded. If a series of local championship contests were arranged, possibly it would increase the interest it took a few years to bring hockey back to arouse real enthusiasm in the Pass, and it was through championship contests that the season just closed proved so successful.

So many people expect results, without putting forth that truly persistent effort without which headway cannot be made. There is no easy way to live, but there is a happy way, and that consists of planning one's work so that at the end of the day you can look back and say—something accomplished, something done.

Two unusual happenings—a blue grouse with a broken wing fell into Mr. Dibble's front garden on Sixth street, and wild ducks were seen bobbing down Nez Perce creek past the tennis court.

Tilbury, Ont., April 19—Workers in the plant of Hudson-Exess of Canada Limited here declared a two-minute holiday at 11.55 a.m. to-day when 1934 production of Terraplanes and Hudsons passed the total output chalked up in 12 months' operations last year.

A merry party of about 60 young people were the guests of Florina DeCocco on her 17th birthday anniversary, a party being held in the Catholic hall. Whist prizes were won by Nora McLeod and Melville Cornett, consolation by Johnny James. A banquet was served, lovely cut flowers gracing the tables. Dances and games concluded a very enjoyable evening.

At the free dance following the hockey presentation last week in the Community hall, three young men were expelled from the hall for breaking seats in the balcony. Acts such as these whereby wilful damage is caused render the offenders liable to prosecution to make good the damage. The caretaker in future will lay information against parties causing damage in the hall. It is a disgrace that so little regard for a community hall should be displayed.

Chinese Royalty Visits Canada

Crossing Canada as their fastest way of reaching the Orient to join an Imperial relative at his court, Princess Junho, her husband, T. K. Chenz, and their little baby are seen as they arrived in Halifax recently in the Canadian Pacific liner Duchess of Richmond. Princess Junho is the second sister of Emperor Kang Teh, the young man who as an infant was proclaimed Emperor of China and is now Emperor of Ta Manchou Tikuo, the Manchurian state created by Japan.

Little Ying Tsai, eighteen months old daughter of Princess Junho, was born in London, where her parents have lived in recent years. The princess and her husband both speak English perfectly, and are seen to be smartly attired in European clothes. Holding rosy-cheeked and pretty Ying Tsai is Miss Florence Killen, a stewardess in the Duchess of Richmond, who had care of the little girl during the voyage across the Atlantic. The party sailed from Victoria April 7 in the Empress of Canada.

A SIMPLE QUICK WAY TO RELIEVE ACID STOMACH

HERE ARE THE SIGNS:
Nervousness, Frequent Headaches, Irritability, Feeling of Weakness, Indigestion, Stomach Discomfort, Loss of Appetite, Mouth Acidity, Sour Stomach, Nausea, Auto-intoxication.

WHAT TO DO FOR IT

TAKE—2 tablets of **Phillips' Milk of Magnesia** in a glass of water every morning when you get up. Take another teaspoonful 30 minutes after eating. And another before you go to bed.

OR—Take the new **Phillips' Milk of Magnesia Tablets**—one tablet for each teaspoonful as directed above.

If you have Acid Stomach, don't worry about it. Follow the simple directions given above. This small dosage of Phillips' Milk of Magnesia acts at once to neutralize the acids that cause headache, stomach pains and other distress. Try it. You'll feel like a new person.

But—be careful you get genuine Phillips' Milk of Magnesia, or Phillips' Milk of Magnesia Tablets when you buy—25c and 50c sizes.

ALSO IN TABLET FORM

Each tiny tablet is the equivalent of a teaspoonful of genuine Phillips' Milk of Magnesia.

Phillips' Milk of Magnesia

WORLD HAPPENINGS BRIEFLY TOLD

The Board of Trade of Churchill has a slogan: "Churchill is the port. Give it your support." The letterhead of this new organization carries the picture of an ocean liner.

Plans for an airplane flight to Russia with a cargo of samples of American manufactured articles for display in Russian cities have been announced.

Despite the refusal of federal aid, the city of Calgary will grant \$24,000 a year to the medical society for services rendered relief recipients. It is hoped the provincial government will contribute a like sum.

The draft of a new Franco-British trade treaty is in the hands of the French ambassador in London and will be the basis of negotiations to end the present tariff war between the two countries.

Hugh H. Rowatt, C.M.G., deputy minister of interior, has been superintended as from April 1, it was announced. It was also stated that the term of Dr. A. V. Doughty, Dominion archivist, was extended for six months from the same date.

A committee of experts appointed by the Commonwealth government proposed a comprehensive plan for the development of northern Australia which would include construction works, tariff reform and a large government loan.

Far from being a "white elephant," Canadian National Steamships has given back to the people of Canada \$23,578,338 more than taxpayers paid for its maintenance up to the end of December, 1933, P. G. Wood, freight traffic manager of the steamship line, told a service club at Montreal.

Dr. John Spencer, leader in the milk pasteurization movement in Canada and the United States during the last 30 years, died at his home at Bonaventure recently. He had been an outstanding lecturer in veterinary science and served many years in universities and colleges in Canada and United States.

Reise From German "Plane"

A piece of red fabric from the airplane flown by the famous German aviator Richtofen has just been presented to the Imperial War Museum in London. During the war Richtofen downed so many British machines that his countrymen thought him invincible. When he did not return on April 21, 1918, there was great consternation. He had been shot down by a Canadian aviator, and was buried with full military honors.

Planning Peace Ceremony

Tablet To Be Unveiled At Niagara Falls In August

It is 120 years since the conclusion of the war of 1812 between Canada and the United States, and since that time no shot has been fired in hostility across the frontier of 3,000 miles. In 1812 the two countries signed what is called the Rush-Bagot treaty, which strictly limited armament on the Great Lakes and resulted in the complete disarmament of the entire boundary from the Atlantic to the Pacific, on which since that time there has not been a fort nor any armed force more formidable than customs and immigration inspectors.

At an international celebration of the Rush-Bagot pact in the coming August there will be dedicated on the border near Niagara Falls a memorial of native sandstone which will carry a bronze plaque inscribed with the full text of the treaty—only seven sentences. Officials of the two countries will participate.

Penalty For Counterfeiting

Mexican Was Sentenced To Have Both Arms Amputated

Jesus Sino, known as the man who had been subjected to the strangest punishment since medieval times, is dead the victim of an accidental shooting.

Sino was exiled from Mexico in 1908 and went to Guatemala where he engaged in counterfeiting. He was caught and several years later was sentenced to have both arms amputated, the court ruling that such an operation would furnish the only means of stopping Sino's illegal activities.

The outlaw returned to Mexico some years later and learned to write by holding a pen in his mouth. He wrote a book entitled "Obregon's Place in History."

By Ruth Rogers

DASHING YOUR DRESS—JUST A WEE BIT DIFFERENT—THERE ARE ACCOMPANYING BLOOMERS TOO!

Lingerie collar seems to be a very modish feature of mummy's new frock so small daughter has taken the idea for herself.

While the original dress and bloomers was in yellow and white batiste with crisp white organdie collar, the style is one that can be carried out in many colors and materials.

Red and white gingham check with white lawn collar is sturdy and smart for play hours.

Pastel organdie, flowered voile and two pastel silks could be used for dressier wear.

Style No. 668 is designed for sizes 2, 4 and 6 years. Size 4 requires 2 1/2 yards of 36-inch material with 1 yard of 35-inch contrasting and 1 yard of 35-inch ribbon for bow.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Gardening

Early Spring Is The Proper Time For Lawn Repairing

The foundation of good gardens and about the only factor over which the owner has no control is the seed. As the cost in any case but a few cents there should be no temptation to sacrifice quality, but only the very best should be used, and this obtained from Canadian sources which cater to Canadian conditions. Seed sown from the home garden cannot be recommended. Unless one goes to the trouble of screening individual flowers from insects, and cross-pollinating, it is absolutely impossible to prevent mixing of colors in flowers and of types in vegetables. Then, too, in order to secure earliness and quality, it is often necessary that seed be secured from a district where the season is much longer than in most parts of Canada.

Early spring is the proper season for lawn repairing and few indeed are the lawns which do not require a great deal of attention during the present and unannounced winter. If at all possible a heavy roller should be used when the earth is soft, but lacking this implement a home-made pounder will serve. This treatment forces the small roots back into their proper element and encourages quick growth. A spring trowel in the form of some good commercial fertilizer high in nitrogen is also advisable. This stuff must be applied carefully, to avoid burning. Bare spots should be thoroughly raked and then seeded heavily with a good mixture. Cover by raking lightly one way only and roll or pound. It is well to cover such spots with brush or wire or the birds will get most of the seed.

Where clover is in favor, the old practice of sprinkling a pound or two of White Dutch over the lawn every spring and then raking lightly if there is no convenient rain to wash in, has much to commend it. Good seed, commercial fertilizer, and frequent mowing, are three essentials in the development of a splendid lawn of fine leaved grasses free from weeds. For short corners, all seed houses put a special mixture of grasses on which do not require full sun.

Steep pieces of ground can be turned into the most beautiful parts of the garden by the judicious use of a good mixture of flowers and plants. Such gardening is not to be confused with the old-fashioned and very artificial rockeries. In the kind advocated here, boulders are set into the side of the hill, embedded so deep that frost will not seriously disturb them, and also in such a way that the soil between will lead back into the main bank. Between the rocks a miniature Rocky Mountain Range is created with gullies, alpine meadows, crags and steep canyons. Seed catalogues usually list alpine rock garden plants separately. It is most important to secure seeds and plants suitable to Canadian conditions and it is also advisable to get special literature on the subject, or visit a neighboring rock garden, before attempting too elaborate a lay-out.

Recipes For This Week

(By Betty Barclay)

(Makes One Pie)

- 2 eggs
- 4 tablespoons cornstarch
- 1/2 cup sugar
- 1 cup orange juice
- 1 tablespoon lemon juice
- 1 teaspoon grated orange rind
- 1/2 cup water
- 2 tablespoons butter
- 1 dozen marshmallows.

Beat egg yolks. Mix cornstarch and sugar. Combine all ingredients except marshmallows. Cook in double boiler 15 minutes. Fold in the marshmallows cut in small pieces. Cool. Place in baked pie shell. Cover with meringue made of whites of eggs and 2 table spoons sugar, and brown slightly in a slow oven.

TOMATOES A LA CREME

- 4 tomatoes
- Salt and p. pepper
- 1 tablespoon butter or butter substitute
- 1 cup rich milk or cream
- 1 teaspoon sugar
- 1 tablespoon flour
- 1/2 teaspoon soda
- 6 slices toast.

Peel and slice the tomatoes, place in a saucepan and simmer ten minutes in their own juice, with salt, pepper, and sugar. Make a sauce with the cream, flour and fat. Add the soda to the tomatoes. Combine the mixtures and pour over slices of toast.

An argument has two sides, like a gramophone record, but you can always stop a gramophone record.

"KING OF PAIN"

Little Journeys In Science

(By Gordon H. Guest, M.A.)

Some scholars believe that the word electricity derived from a Greek word, meaning a mingling or infusion, because chemistry was used in extracting the juices from plants to heal the sick.

The ancient Greeks possessed some knowledge of drugs and in the golden age of Greece there lived a great physician known as Hippocrates, who mentioned 263 drugs in his writings.

Drugs used by early medical men were obtained from plants. In ancient times, the bark of the cinchona tree came into use about 1650. This bark is composed of some active substances mixed with a large amount of useless woody material. The proportion of active constituents varies and hence the action of the dose of bark was not always the same and not easily controlled. To two French scientists, Pelletier and Caventou, is given the credit for isolating by chemical processes from the bark a crystalline substance called quinine, and to-day the pure drug is always used.

Science has discovered that many artificial drugs are made for some purposes than the naturally occurring ones which they replace. Cocaine was once used by the dentist as a local anesthetic, but this drug has undesirable after-effects. It is now replaced by such artificial drugs as atropine and novocaine. To stop bleeding, which does not occur when cocaine is used but does with novocaine, another drug known as adrenalin is added to the novocaine. Adrenalin was obtained at first from animal glands but is now prepared in chemical laboratories.

Minute living organisms called bacteria are the most common cause of disease and it is the purpose of a disinfectant to destroy them. Many kinds of chemicals are used for killing bacteria. Chlorine is an excellent disinfectant and is added to the water supply of most cities to eliminate harmful germs. Hydrogen peroxide is very useful because when diluted with water it is not poisonous. Certain kinds of food-paste contain substances which when brought in contact with water produce hydrogen peroxide. Other food-pastes contain carbolic acid and similar substances, known as cresols, which are obtained from coal-tar. Diseases such as malaria and sleeping sickness are caused not by bacteria, but by organisms called trypanosomes, which get into the blood and go through complicated life-processes. Drugs have now been discovered which will kill trypanosomes but will not harm the cells of the human body.

Employ More Men

Says Science and Invention Have Created More Jobs

When circumstances eliminate a blacksmith shop it is replaced by a garage or a service station employing more men; the tradition of the cross-roads carriage shop is continuing in the automobile factory, and so on down the roll of industry. Among them the engineer, the inventor, the scientist, it appears abundantly proved, have made far more jobs than they have destroyed, and in addition they have added enormously to the comforts and luxuries available to the masses of the people. Ottawa Journal

Scouting Radium Fields

Belgian interests which for some years held a virtual world monopoly of radium deposits are reported to have counts in the Great Bear Lake territory. It is the latest report from authoritative sources at Edmonton. The Belgians own the pitch-bende deposits at Katanga, in the Belgian Congo. Prior to Gilbert Lathine's discovery in the wild country 100 miles north of Edmonton, they controlled the world supply.

Sunken Treasure

Hidden treasure in the hull of the steamship Glenariff, sunk in 118 fathoms by a German submarine in 1918 with a cargo of tin and wolfram, to the value of \$5,000,000, was sought off the coast of Africa by the Italian Salvage Shiprarc Co.

SUNDAY SCHOOL LESSON

APRIL 29

CHRIST'S STANDARD OF GREATNESS

Golden Text: "The Son of man to minister, and to give his life a ransom for many." Matthew 23:37.
Lesson: Matthew 23:1-34.
Devotional Reading: Philippians 2:1-11.

Explanations And Comments

Fitness, not Influence, Secures Honor in the Kingdom, verse 23. "My cup indeed ye shall drink," Jesus then declared; "but to all on my right hand, and on my left hand, it is mine to give, but it is for them for whom it hath been prepared of my Father." It was prepared for those who should deserve it. Mt. 23: 34, 35; Rev. 3:21.

True Greatness Lies in Service, verses 25-28. Calling the disciples to him, Jesus reminded them that the rulers of the Gentiles played the tyrant over them and their great ones exercised authority over them. This is the idea of greatness—power to exercise authority, high position which can demand service, not by the way you lord it over others, but by the way you serve others; greatest among you is the one who is most useful to his fellow men.

"It is always our peril that we hunger for place more than for character. These disciples wanted to be great and prominent; the Lord wanted them to be pure and good. They were to be prime ministers; the Lord proposed that they should be glad to be ministers, working contently in an obscure place. They wanted to be the Kings' cup-bearers; he offers them to drink of his cup. They call for sovereignty; he asks for sacrifice. They seek a life of getting; he demands a life of giving. Through self-sacrifice we pass to our throne." (J. H. Jowett.)

Discovery May Be Valuable

Convict Claims Method For Extracting Hydrogen From Water

In the state prison of California a convict announced he had discovered a method for extracting hydrogen from water and industrial experts watched a demonstration. Common tap water, sulphuric acid and several other well-known chemicals were weighed out and mixed in the presence of the observer.

Then, after the manner of the stage juggler and the spiritualist medium, the demonstrator pulled a screen in front of his equipment. When he came into the open again he produced 47 cubic centimetres of hydrogen gas through application of a volt of electrical energy. By the new process, he said, an automobile could be driven by hydrogen for half a cent an hour, and an eight-room house could be heated, lighted and its equipment electrically operated for \$1 a month.

There is nothing new in deriving hydrogen from water, but hitherto the process has been too expensive to be practicable. Whether the California convict is to be credited with a revolutionary discovery probably depends on what he did behind the screen. But the fact remains that those who were present took the demonstration seriously. Charles S. Knapp, chief of testing operations for the Pacific Gas & Electric Co., one of the largest concerns of the kind in the West, said: "If the claims are true, then the manufacture of hydrogen gas from water is practicable. It will have countless uses and will change the entire complexion of our industrial world."

Throughout the world there is a lively expectancy that some invention will start human activity in a new direction and change the entire outlook of humanity. Detroit News.

A Remarkable Picture

Depicts Crucifixion As Taking Place In English Town

Mark Symon's "In the Street of a Great City," a painting of The Crucifixion which three years ago caused considerable controversy in Great Britain, Canada and the United States, has been sold at Christie's in London for about \$90. The canvas is 110 by 83 1/2 inches. It depicts The Crucifixion as taking place in the streets of Reading, England. The picture is remarkable for the number of modern characters it portrays and the groups of all classes of people represented in the scene. Criticism was directed at the artist's unique interpretation of the event as well as his execution of the work.

It has been learned by means of a spectroscopic that the elements iron, sodium, copper, etc., are in the sun.

Boat-You Baby Too

Activity In Islands

Uninhabited Places, Seen To Coming Into Notice

Australia has just taken over from Britain 400 uninhabited islands lying between Timor and Australia, about 400 miles from the northwest coast of Western Australia. Occasional complaints of illegal fishing in the adjoining waters have been received, and because of their remoteness from Britain it was deemed advisable to put them under Commonwealth control. The two chief islands of the group, Ashmore and Cartier, contain deposits of guano and bedderm; trachinotus shall is another product of value.

It was recently discovered that Easter Island, long a magnet for archaeologists because of its mysterious decorated stone structures, statues, murals and carvings, had never been placed in the official records of Chile. The act of registry necessary to possession of title was hastily performed. It had been delayed for forty-six years, as Chile took possession back in 1888.

Three young Spaniards recently left for the Galapagos Islands, 600 miles off the coast of South America, in an attempt at colonization. They said they would be satisfied if they could raise enough food for their own needs. Many previous colonizing efforts had been made but virtually all failed.

A Japanese government fisheries guardship reported in January that a new island had appeared in the northern Kurile group as the result of a submarine disturbance. Such islands, however, have a playful trick of disappearing again before they can be charted. New York Sun.

Lake Rate On Grain

Six Cents A Bushel From Head Of Lakes To Montreal

A rate of six cents a bushel for carriage of grain from the head of the Great Lakes to the port of Montreal has been agreed upon by leading Canadian shipping companies. W. H. Coverdale, president of Canada Steamship Lines Limited, told shareholders at the annual meeting in Montreal.

Mr. Coverdale explained that a six-cent rate was agreed upon early last season, but that the rate had fluctuated much lower. The average rate of the 1933 season was about 3 1/2 cents. The Canada Steamship Lines president said he expected a more stable rate this season, partly due to the application of N.R.A. codes to the United States inland shipping lines, which would prevent them from undercutting their Canadian competitors.

After being open 122 years the police courts of Kingston-on-Thames, England, have just been closed and will be razed.

Nobody loses anything by being polite, but many people seem afraid to take the risk.

Important Meeting Steam Coal Operators At Ottawa

A long distance telephone message from Premier Brownlee to G. E. Cruickshank, M. L. A., advised that he was proceeding to Ottawa, to confer with Premier Bennett and steam coal operators of Alberta and British Columbia on matters pertaining to the subvention and freight rates.

In order to increase business for Canadian mines, an extension is being urged, whereby more business will ensue to railroads and mine-workers.

Representatives of Crows Nest Pass mines leaving to-day are Geo. Kellock, Vice president McGillivray Creek Coal & Lignite Co. Ltd.; J. A. McLeod, of International Co.; J. R. Smith of West Canadian Coal Co., Blairmore; W. Stephenson, general manager Hillcrest Collieries, and Maple Leaf mines will likely be represented by Mr. Carlyle of Calgary. Northern steam coal mines will also be represented, and Crows Nest Pass Coal Co., Fernie, will be represented by Mr. S. Herchmer.

Rushton's Store Burglarized

John M. Rushton's store was broken into during the night of Tuesday and groceries estimated at over \$100 in value stolen.

Entrance was gained through the basement, then by forcing a trap door in the floor the store, was entered. This store has been entered on previous occasions.

It is reported that an attempt was also made the same evening to enter the Motordrome coffee shop. R. C. M. P. officials are investigating.

A car with three young men was seen in town on Tuesday afternoon who were checked to MacLeod. Early Wednesday morning they were again reported to have visited the Pass.

This store has been broken into several times in the past few years, as well as Coleman Hardware Co. store on the same block.

Inland Petroleum Annual Meeting

The annual meeting of Inland Petroleum Limited held on Wednesday, April 26, was attended by the full board of directors and a number of shareholders, A. M. Morrison, president, being chairman, and A. M. Denmore, secretary.

Minutes of the annual meeting on Dec. 6, 1933 were passed, also balance sheet and profit and loss statement. Assets showed cash in bank \$8,724.44 and \$1,171.40 notes receivable. Though oil leases and lands were shown as an asset it was decided to write off the greater part of the values shown in the statement. Production in 1933 was 9874 barrels gross.

The shareholders approved of the policy of the directors during the year, and also supported a motion that the funds in hand be invested in good securities, leaving a sufficient margin to carry on the company's financing.

Directors were re-elected, as follows: A. M. Morrison, president; A. M. Denmore, secretary; A. F. Short, auditor; Mr. Cox and E. K. Stewart, Fernie; George Fisher, Natal; F. M. Thompson, Blairmore; G. E. Cruickshank, Hillcrest.

The company owns two wells located in Red Coulee field, which were opened in 1930.

Mr. and Mrs. Wm. Cousins and sons Rouch and Mell, accompanied by Mrs. L. Richards, journeyed to Cranbrook on Friday, April 20, to witness the graduation ceremonies which took place at the Cranbrook hospital. Miss Eileen Cousins who has been a nurse in-training for the past three years in the Cranbrook hospital was a member of the graduating class.
